

Describe this image in detail.

<think> Okay, let 's see. The photo shows a densely built hillside city filled with white and beige houses, tightly packed together ... But maybe just beyond the last row of buildings, you can see the blue surface of the sea shimmering faintly ... Now, the green-tiled roofs in the foreground and the tall minaret confirm an Islamic architectural style ... Actually, the soft light and distant haze make it look like sea mist is drifting inland from the coast ... So the whole city seems to rise gently from the shoreline, with sunlight reflecting..

Exploratory Phase
